

# Climate-Just Worldings

For the FilmEU Artistic Research Exhibition 2023 I would like to propose a two channel installation of my story-world *ELSA - New Reactive Earth*, developed within the research project Climate-Just Worldings.

Lina Persson

## Stockholm University of the Arts

The research project Climate-Just Worldings has resulted in a transmedia storytelling that utilizes its low-carbon production infrastructures as narrative platforms. I want to portray research by presenting;

Screen 1:

*ELSA-New Reactive Earth*, (2 min loop) introduction to story-world. A work in progress can be downloaded [here](#). A finished version (editing & postproduction) will be ready by august.

Screen 2:

*ELSA- climate calculator*. A browser with my web-tool [www.elsa.film](http://www.elsa.film) available for the visitor to browse and explore. A booklet will give more background to how the the two works are intertwined.

My CV can be downloaded [here](#).
